* In cases of towns where there has been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and death rates.

† Figures not available.

Explanation of symbols used :—B.—Births; B. R.—Birth rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fever; D. D.—Dysentery and Diarrhoeas; R. D.—Respiratory diseases; M. D.—Maternal Deaths; D. R.—Death rate; I. D.—Infantile Deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for the week ending the 11th November 1950 relate to 177 towns with an estimated population of 23,742 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 76% of the total number of towns representing 84% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 15,691 and 7,958 representing birth and death rates of 34.4 and 17.4 per thousand of population respectively.

(A) States (Parts A and O).—The data here relate to 154 towns with an estimated population of 21,254 thousands. Information about Assam, Bihar and Madhya Pradesh could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 76% of the total number of towns representing 86% of the total population is covered. The numbers of births and deaths recorded

in these towns were 14,460 and 7,311 representing birth and death rates of 35.4 and 17.9 per thousand of population respectively. The table at the end gives the position by States.

No towns recorded a high death rate of 50 or over per thousand of population

(B) States (Part B).—The data here relate to 23 towns with an estimated population of 2,488 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 72% of the total number of towns representing 66% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,231 and 647 representing birth and death rates of 25.7 and 13.5 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
